

SMCS Risk's Forklift Driving Accreditation Course (FDAC) is the only one of its kind in Cambodia. Our fully accredited and qualified Instructors conduct the course in Khmer or English and is an intensive 3 day course aligned with Australian standards.

The FDAC gives driver's the skill and knowledge to safely operate a forklift, as well as total comprehension regarding lift capacities, maintenance, risk assessments, and all other aspects related to the operation of a forklift.

Each course is conducted at the participants' workplace to give the student real world operational experience, and consists of theoretical, practical, and assessment modules.

All participants who successfully complete the Forklift Driving Accreditation Course will receive a certificate, as well as an official Accreditation Card.
