

SMCS Risk's Working At Safe Heights training provides participants with an awareness of the necessary requirements to perform task safely at heights, including fall protection equipment, risk management and industry best practices & standards.

SMCS Risk's Working At Heights trainers are accredited to Australian Standards and have years of operational and training experience.

Each course is conducted at the participants' workplace to give the student real world operational experience, and consists of theoretical, practical, and assessment modules. Where a theory classroom is unavailable, classes are conducted in SMCS Risk's training facility.

All participants who successfully complete the Working at Safe Heights Accreditation Course will receive a certificate, as well as an official Accreditation Card.
