

WORKING IN CONFINED SPACES ACCREDITATION

SMCS Risk's Work in Confined Spaces Accreditation Course (WCS) provides participants with the skills and knowledge to safely work in small spaces, that can very often be toxic and dangerous.

Our course will equip students with a vast knowledge base that includes using a Breathing Apparatus, Atmospheric testing, and Risk Management.

SMCS Risk's Confined Spaces Trainers are accredited to Australian Standards and have years of operational and training experience.

Each course is conducted at the participants' workplace to give the student real world operational experience, and consists of theoretical, practical, and assessment modules. Where a theory classroom is unavailable, classes are conducted in SMCS Risk's training facility.

All participants who successfully complete the Work in Confined Spaces Accreditation Course will receive a certificate, as well as an official Accreditation Card.

Modules of the Work In Confined Spaces Accreditation Course

- Company Confined Spaces Procedures
- Definitions and types of Confined Spaces
- Hazard Identification and Risk Management Procedures
- Hazardous Atmospheres, including Gas Monitoring Techniques
- Isolation, Purging, Ventilation; Permits and Authority
