

BASIC FIRST AID WITH CPR & AED

The **Basic First Aid with CPR & AED**

course is open to everyone, but is designed especially for those first responders who want to increase the survival rate of heart attack casualties using defibrillators. Prior knowledge in CPR is necessary for this course.

Course Content:

- Learn how to recognize a medical emergency and activate Cambodian emergency medical services (EMS).
- Learn how to recognize the typical signs and symptoms of a heart attack, cardiac arrest, and choking.
- Learn how to perform a primary assessment on a patient using the AB-CABS memory word.
- Learn how to administer a cardiopulmonary resuscitation (CPR) and use an Automated External Defibrillator (AED).
- Learn how to recognise and treat a choking adult, child, and infant.

Course Duration: 8 training hours (1 day training) Certification: 2 years

All of our First Aid Training Courses are conducted by a qualified British Nurse, and fully accredited Cambodian personnel.

Courses are designed to align with the American Heart Association (AHA) guidelines and procedures.

After completion, your business/school/company will receive a First Aid 4 Life certificate and poster.

Each participant will be given a First Aid Certified ID carry card.
