

HAZARDOUS AREAS AWARENESS COURSE

Overview - The Hazardous Areas Awareness course aims to train various personnel on the risks of operating in high-risk flammable and combustible environments. It will equip personnel with the skills to identify risks and implement suitable control measures to reduce the hazard to acceptable safe levels.

Who Is This Course For? – All Employees Involved in Workplace Safety Roles

Course Duration: 1 Day (8 hours)

Course Modules:

- Identifying standards, codes of practices and legislation relating to hazardous areas
- Defining and identifying different hazardous area zones
- Defining hazardous area zones, including signage and classification layout drawings
- Defining conditions and sources of ignition
- Identifying properties of flammable materials
- Identifying equipment that may produce arcs and sparks
- Hot works procedures
- Explaining the requirements for equipment that may produce arcs and sparks
- Identifying requirements for maintenance and installation works in hazardous areas

Courses are delivered in Khmer or English by highly qualified Instructors, who have many years of experience in their field.

Training modules can be customized to suit the required industry.
