

# INCIDENT COMMANDER & CONTROLLER COURSE

**Overview** - This training course applies to personnel in incident command/control roles, or similar roles in the workplace who are required to minimise the escalation of workplace incidents, allocate resources and assets, plan tactical responses, communicate with the incident response team, interact with external agencies required to assist with the incident, and gather information about the incident.

**Course Duration:** 3 Days (24 hours)

## Course Modules:

- Cambodia Standards and relevant regulations and legislation
- Risk assessment and hazard elimination
- Applying the responsibilities of a Commander/Controller
- Controlling communication under pressure
- Team leadership and rapid decision making
- Managing incident response information
- Developing and enacting an incident action plan
- Developing incident containment tactics
- Managing emergency incidents
- How to coordinate and communicate with external emergency response personnel

Courses are delivered in Khmer or English by highly qualified Instructors, who have many years of experience in their field.

Training modules can be customized to suit the required industry.
